INTRODUCING THE ACADIA COLLECTION WITH RECYCLED CONTENT

Showroom 11-35 - Neocon 2007 – Fortune Contract introduces The Acadia Collection with high-performance NATIQ ENVIROWORK 30 nylon carpet fiber, with 30 percent recycled content. The Acadia Collection features two patterns; Acadia Texture – a 46 oz. tip shear with subtle shimmer and Acadia Stripe – a cut/uncut tailored linear pattern also with lustrous accent. The 37-color palette is inspired by animal, vegetable and mineral colors carefully selected to be exceptionally usable.

“Fortune is proud to launch this new collection with recycled content to help meet the specification requirements of high-performance, sustainable buildings and interiors,” stated Judith Ingalls, vice president of style and design. “Creating environmentally sustainable products that are both performance driven and beautiful represent the direction the design community has indicated they would like to specify. The Acadia introduction is just the first of our products that will meet that need.”

NATIQ ENVIROWORK 30 branded Nylon 6 from Nylene contains a minimum of 30 percent recycled content. Natiq is manufactured in a closed loop, fiber to fiber recycling manufacturing process in the longest continuously running depolymerization facility in North America. Products produced with Natiq qualify for Nylene’s 360 closed loop recycling and carpet take back program and contribute toward LEED certification. All Nylene products are SCS certified, and Nylene is a partner in the Carpet America Recovery Effort’s Reclamation Network.
